

CB23F35: Low-Code Application Development using Zoho Creator

Name: Merlyn Sosa Saju

Register No.: 240701309

Ex. 6: Implementation of 10 Deluge Functions in Zoho Creator

AIM:

To implement and demonstrate ten basic Deluge functions in Zoho Creator for performing data manipulation, calculation, and automation tasks.

PROCEDURE:

1. Create a new application in Zoho Creator.
2. Create a form with suitable fields such as Name, Quantity, Price, Email, and Date.
3. Open the form's Workflow or Actions section and select Deluge Script.
4. Write and execute Deluge statements using different built-in functions.
5. Test each function by entering sample values in the form.
6. Verify the output and save the application.

OUTPUT:

Deluge

by Zoho Creator

RESULT:

Thus, ten Deluge functions were successfully implemented and demonstrated in Zoho Creator for performing various text, numeric, and data validation operations.
