**CB23F35: Low-Code Application Development using Zoho Creator**

**Name:** Merlyn Sosa Saju

**Register No.:** 240701309

**Ex. 12: Approval Process**

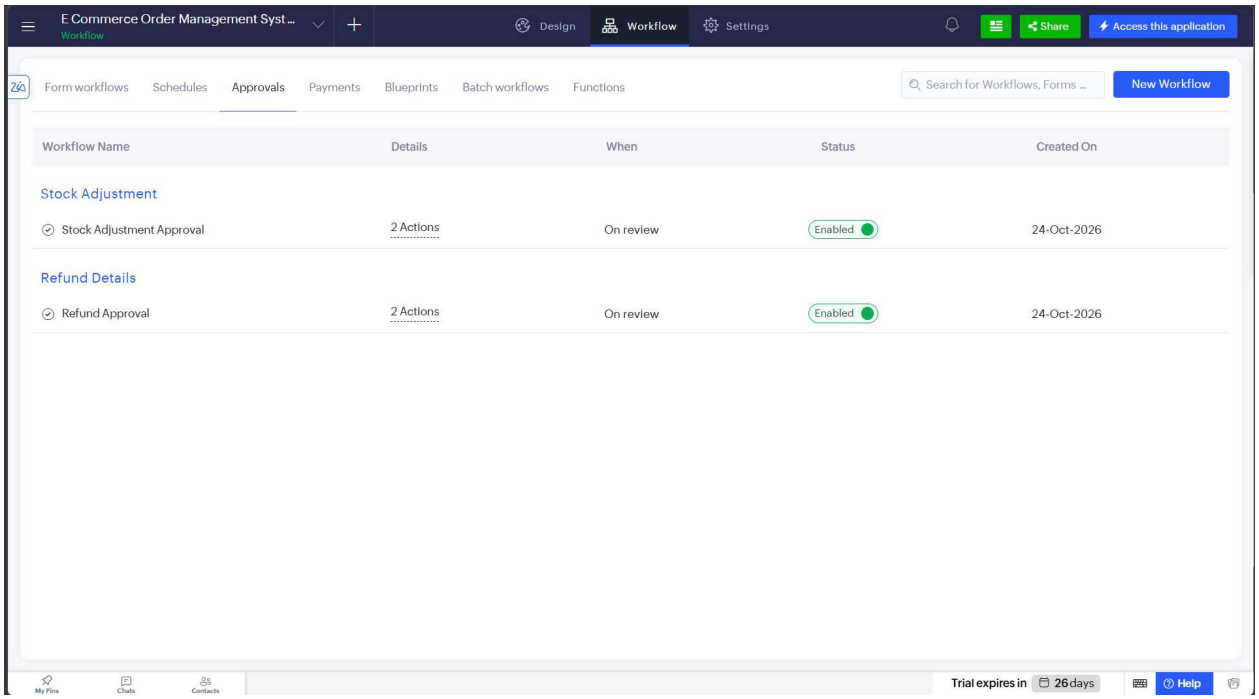

**AIM:**

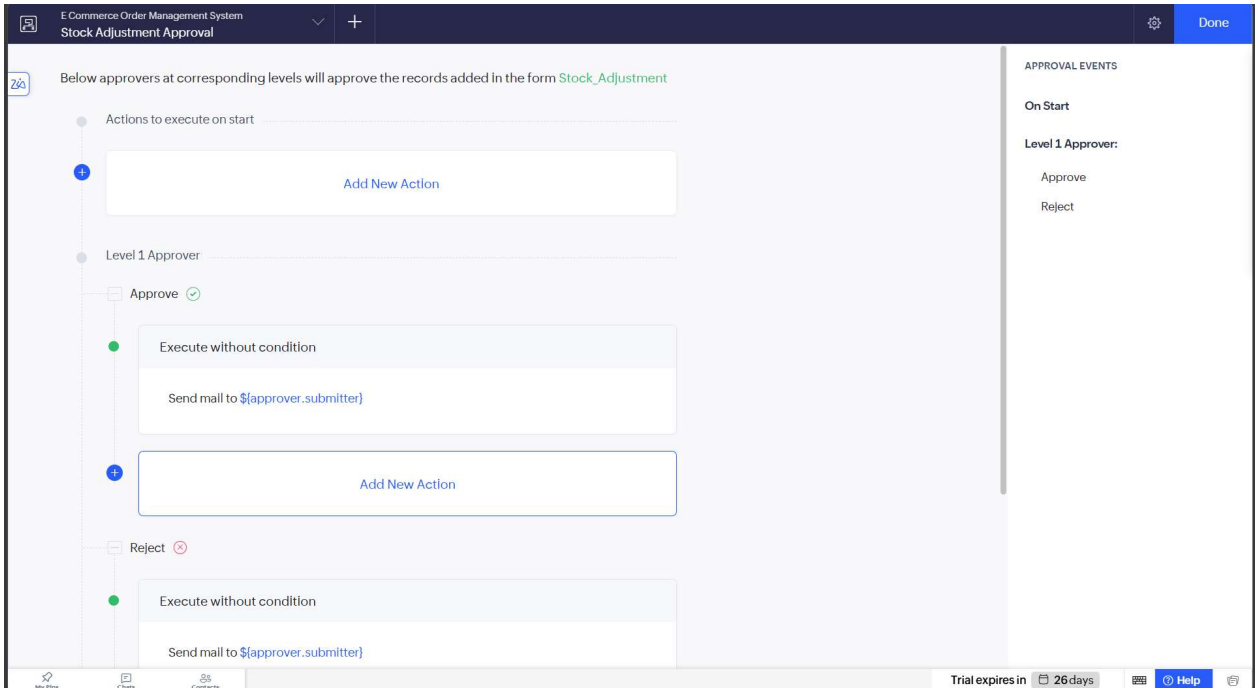

To create and configure an approval process in Zoho Creator to review, approve, or reject submitted records based on predefined conditions and assigned approvers.

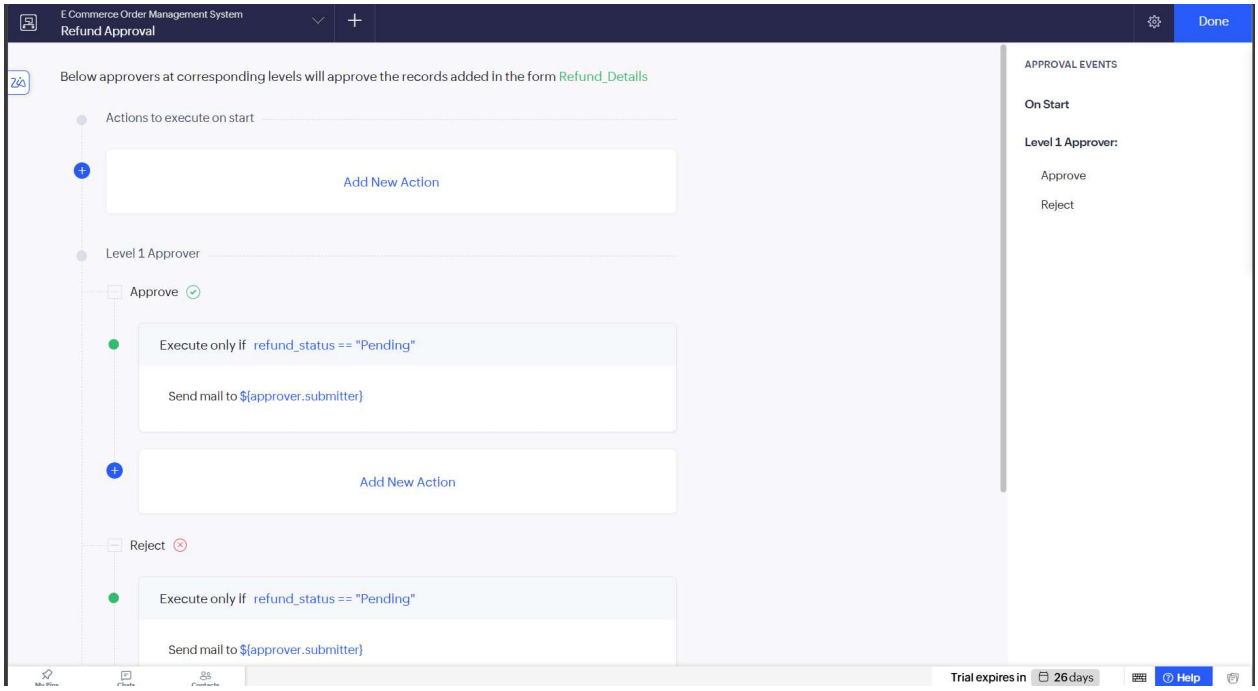

**PROCEDURE:**

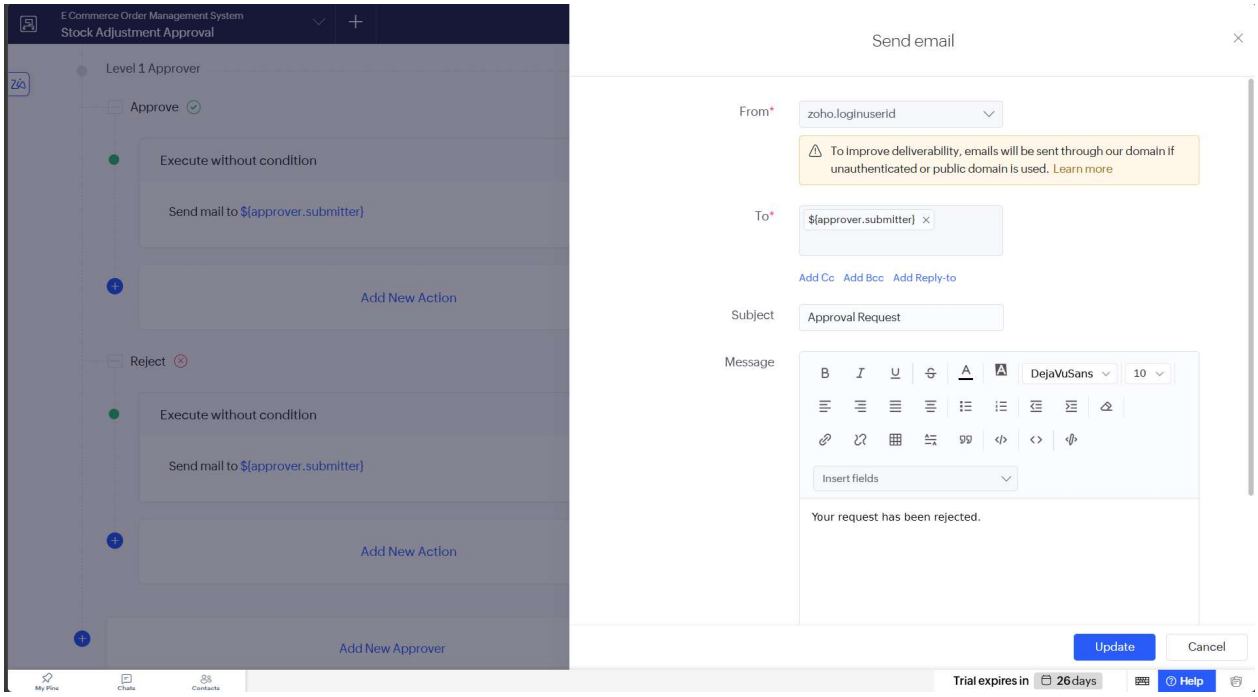

1. Open the application in Zoho Creator and navigate to the Workflows section.
2. Select Approval Processes and click Create Approval Process.
3. Choose the required form and specify the conditions under which the approval process should be triggered.
4. Configure the approval levels and assign the appropriate users or administrators as approvers.
5. Define the actions to be performed when a record is approved or rejected, such as updating field values or sending email notifications.
6. Save and activate the approval process, then test it by submitting a record and verify.

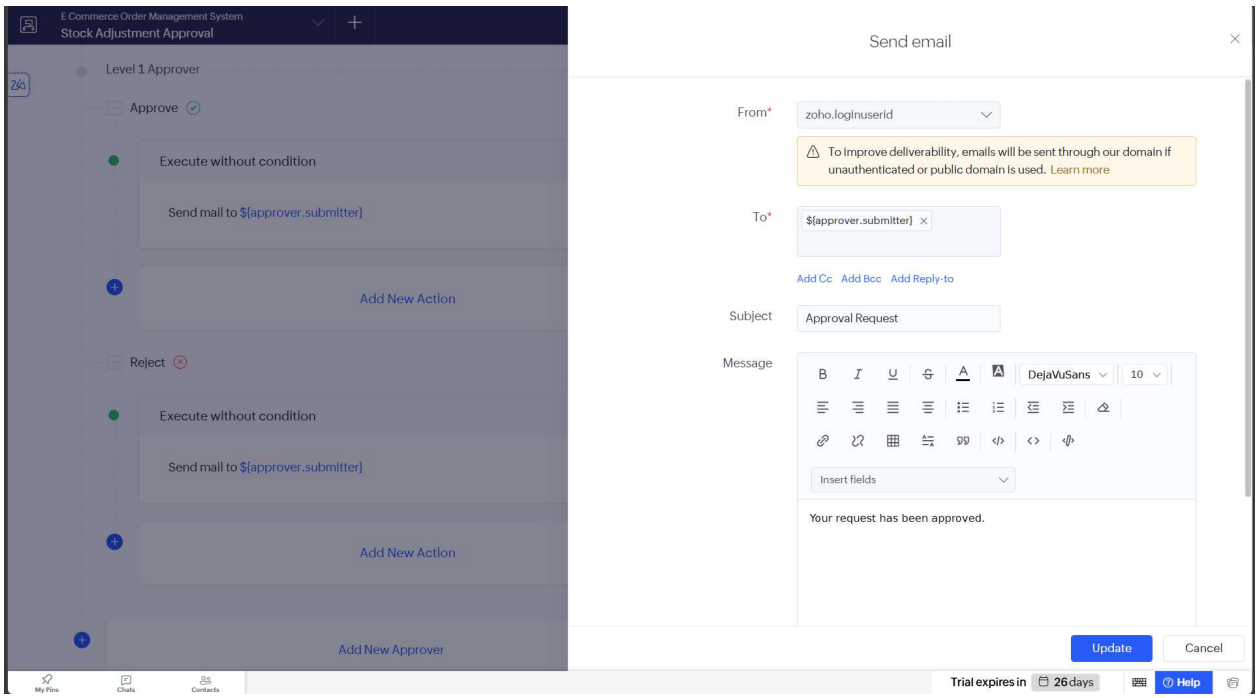

**OUTPUT:**

E Commerce Order Management System
Stock Adjustment Approval
Done
Below approvers at corresponding levels will approve the records added in the form Stock_Adjustment
Actions to execute on start
Add New Action
Level 1 Approver
Approve

**RESULT:**

Thus, an approval process was successfully created and configured in Zoho Creator to manage record approvals and rejections systematically, ensuring better control, accountability, and efficiency in application processes.
