CB23F35: Low-Code Application Development using Zoho Creator

Name: Merlyn Sosa Saju

Register No.: 240701309

Ex. 9: Blueprint

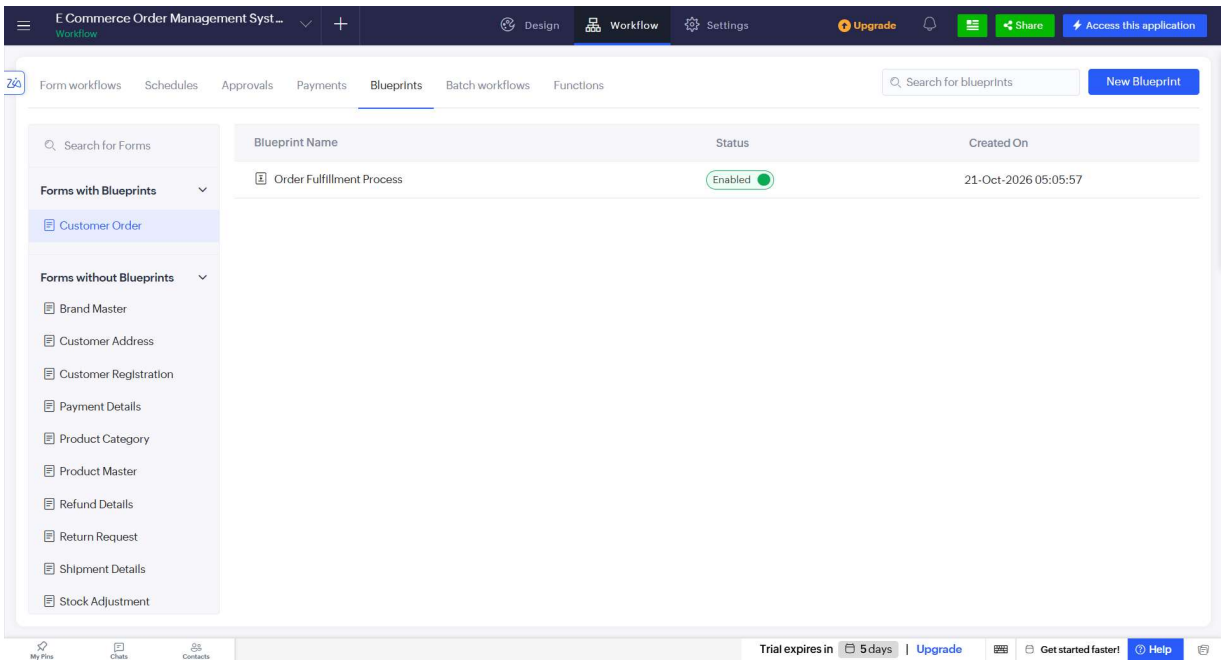

AIM:

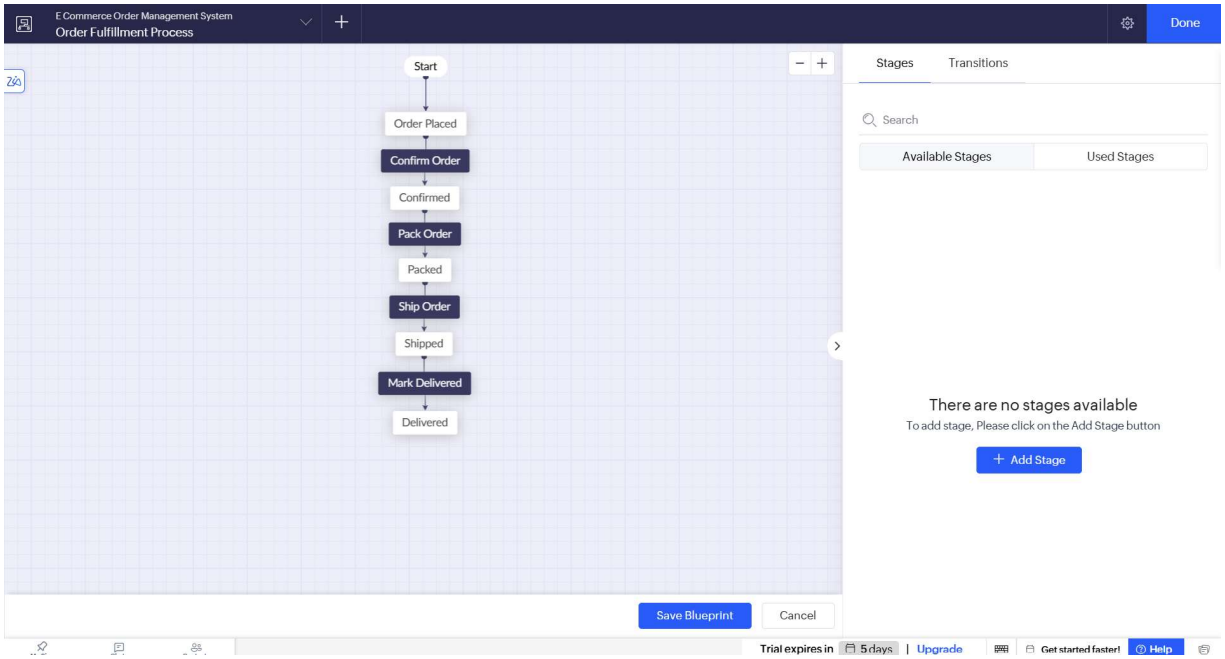

To create and configure a Blueprint in Zoho Creator to define and manage a structured process by specifying stages, transitions, and conditions for controlling the flow of records within an application.

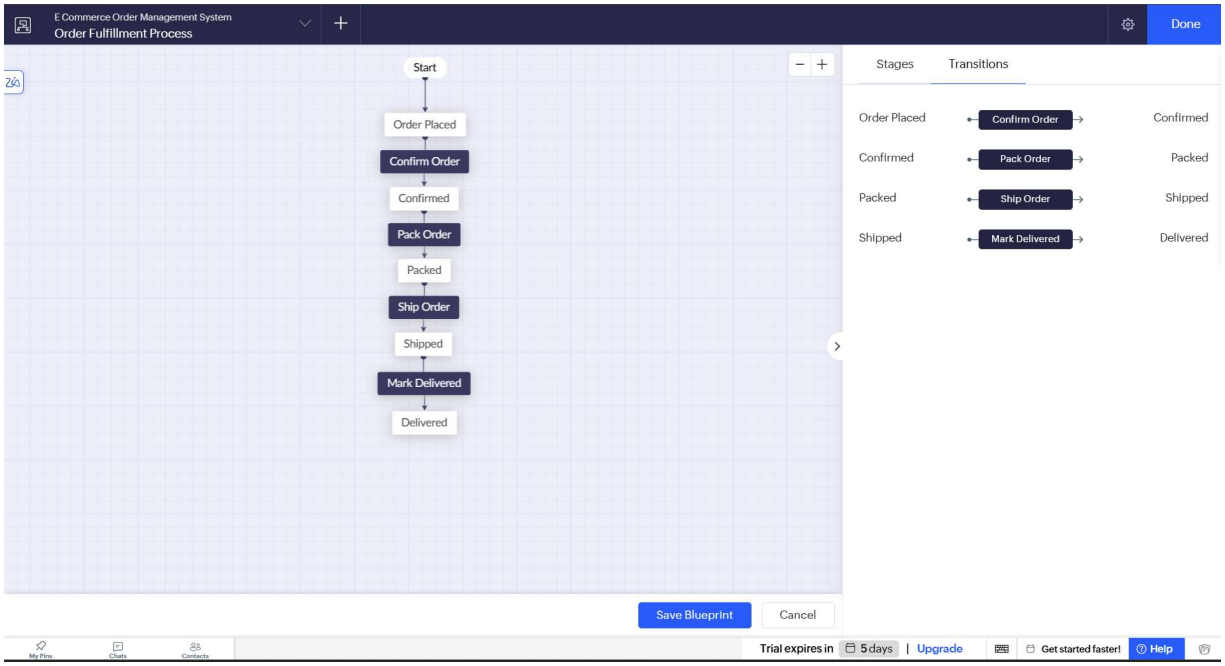

PROCEDURE:

1. Open the application in Zoho Creator and navigate to the Workflows section.
2. Select Blueprints and click Create Blueprint.
3. Choose the required form and specify the field that determines the stages of the process.
4. Define the different stages and configure transitions between them.
5. Set the conditions, actions, and validations required for each transition.
6. Save and publish the Blueprint, then test it by moving records through the defined stages.

OUTPUT:

RESULT:

Thus, a Blueprint was successfully created and configured in Zoho Creator to manage business processes through predefined stages and transitions, ensuring a structured and controlled workflow.
